

Milka-Ware

Total Dairy Systems **MILKA-WARE 4000** **PULSATION CONTROLLER**

Precise Pulsation for Your Milking System

The Milka-Ware 4000 pulsation controller provides each pulsator with precise electronic control to ensure accurate speed and milking phases.

An internal switch mode power supply ensures power for the pulsation system is maintained at a constant level provided the input supply remains between 110 and 250 volts AC. This system also provides protection against power surges and overloading.

One Milka-Ware 4000 controller is suitable for up to 60 milking units when used with the Milka-Ware TL or LE20 pulsators.

The pulsation speed and milking ratio is able to be adjusted with the option of varying the milking ratio between front and rear quarters being available.

LE 20 PULSATOR

TL PULSATOR

FEATURES

- * **Accurate**
- * **Reliable**
- * **Inbuilt Power Supply**
- * **Adjustable Rate and Ratio**
- * **Variable Milking Ratio Between front and Rear Quarters**
- * **Made In Australia**
