## INDUSTRIAL PLATE HEAT EXCHANGER

The Milka-Ware Industrial Plate Heat Exchanger (PHE) ensures optimum cooling of your milk before it enters the bulk milk holding tank. The large stainless steel plates provide the milk with greater contact surface area resulting in more efficient cooling. The extra cooling offered by this larger size PHE over the older smaller size PHE saves you money by reducing refrigeration running costs.

The 51mm inlet and outlet tube connections along with large internal interconnecting plate flow passage reduces flow restriction therefore improving milk flow and cooling.

### FEATURES

- \* Large Surface Area
- \* S/S Bolts & Brass Nuts
- \* 51mm Milk & Water Connection
- \* High Efficiency
- \* Low Maintenance
- \* 316 S/S Plates
- \* Quality Construction
- \* Single or Double Bank
